

# Drugs Identified in Deceased Persons by Florida Medical Examiners

## 2010 Interim Report

## Data Collection

The Florida Department of Health, Office of Vital Statistics has recorded that approximately 89,800 deaths occurred in Florida during January through June 2010. Of these, the medical examiners reported on 4,150 drug-related deaths (whether the cause of death or merely present) through toxicology reports submitted to the Medical Examiners Commission. In order for a death to be considered “drug-related” there must be at least one drug identified in the decedent, which is a drug occurrence. The vast majority of these 4,150 cases involved more than one drug listed in the report.

The state’s medical examiners were asked to distinguish between the drugs being the “cause” of death or merely “present” in the body at the time of death. A drug is only indicated as the cause of death when, after examining all evidence and the autopsy and toxicology results, the medical examiner determines the drug played a causal role in the death. It is not uncommon for a decedent to have multiple drugs listed as a cause of death. When a medical examiner determines a drug is present or identifiable in the decedent, the drug may not have played a causal role in the death. It is not uncommon for a decedent to have multiple drugs listed as present. Because decedents often have multiple drugs listed as cause and/or present, drug occurrence data found within this report should not be aggregated.

Data was collected on the following drugs:

- ✓ Benzodiazepines (Alprazolam, Alpha-hydroxyalprazolam, Clonazepam, 7-Aminoclonazepam, Chlordiazepoxide, Desalkylflurazepam, Diazepam, Estazolam, Flunitrazepam, Flurazepam, Lorazepam, Midazolam, Nordiazepam, Oxazepam, Temazepam, Triazolam, and Alpha-hydroxytriazolam);
- ✓ Cannabinoids;
- ✓ Carisoprodol/Meprobamate;
- ✓ Cocaine;
- ✓ Ethyl Alcohol;
- ✓ Gamma-Hydroxybutyric Acid (GHB);
- ✓ Inhalants (Chlorodifluoromethane, Difluoroethane, Freon, Helium, Nitrous Oxide, and Toluene);
- ✓ Ketamine;
- ✓ Methylated Amphetamines (Amphetamines, Methamphetamine, MDMA (Ecstasy), MDA, MDEA, and Phentermine);
- ✓ Opioids (Buprenorphine, Codeine, Fentanyl, Heroin, Hydrocodone, Hydromorphone, Meperidine, Methadone, Morphine, Oxycodone, Oxymorphone, Propoxyphene, and Tramadol);
- ✓ Phencyclidine (PCP); and
- ✓ Zolpidem.

The Medical Examiners Commission began tracking Alpha-hydroxyalprazolam, Chlordiazepoxide, Chlorodifluoromethane, Clonazepam, 7-Aminoclonazepam, Desalkylflurazepam, Estazolam, Flurazepam, Lorazepam, Midazolam, Nordiazepam, Oxazepam, Temazepam, Triazolam, Alpha-hydroxytriazolam, Helium, Toluene, and Codeine in January 2010. The majority of these were included as “Other” drugs in 2009.

Cannabinoids are not a targeted assay in every medical examiner district; as a result, the occurrence of the drug is significantly under reported.

Pending cases are not included in this report.

Questions regarding this report can be directed to the Medical Examiners Commission Chairman, Bruce A. Hyma, M.D., or Commission staff.

# Report Summary

Some general statewide trends for the first half of 2010 (January – June) are listed below.

- ✓ The four most frequently occurring drugs found in decedents were Ethyl Alcohol (1,831), all Benzodiazepines (1,700 including 986 Alprazolam occurrences), Oxycodone (1,117), and Cocaine (603).
- ✓ The drugs that caused the most deaths were Oxycodone (715), all Benzodiazepines (597 – includes 439 deaths caused by Alprazolam), Methadone (336), Ethyl Alcohol (270), and Cocaine (250).
- ✓ The four drugs where more than 50% of the deaths in which these drugs were found were caused by Heroin (83.3%), Methadone (75.5%), Oxycodone (64.0%) and Fentanyl (52.5%).
- ✓ The prescription drugs (Benzodiazepines, Carisoprodol/Meprobamate, Zolpidem, and all Opioids excluding Heroin) tracked through this report continued to be found more often than illicit drugs in both lethal (87%) and non-lethal (78%) levels. Prescription drugs account for 81% of all drug occurrences in this report when Ethyl Alcohol is excluded.
- ✓ Occurrences of Oxycodone (10.9%) and Hydrocodone (4.1%) increased when compared with the last six months of 2009. Also, deaths caused by Oxycodone (63 more than July-December 2009) and Hydrocodone (10 more than July-December 2009) increased.
- ✓ Heroin continues to be the most lethal drug named in this report. However, occurrences of Heroin have decreased by 40% and deaths caused by Heroin decreased by 40.5% when compared with the last six months of 2009.
- ✓ Methadone occurrences decreased by 4.1% and deaths caused by Methadone also decreased by 1.2%.
- ✓ Cocaine occurrences declined by 15.8% and deaths caused by Cocaine decreased by 11.3%.
- ✓ Alprazolam (Xanax) and Diazepam (Valium) dominate the Benzodiazepines category. Occurrences of Alprazolam increased by 1.0% and Diazepam decreased by 4.4% when compared with the last six months of 2009.
- ✓ Occurrences of Carisoprodol/Meprobamate (10.6%), all Methylated Amphetamine cases (11.0%), and Zolpidem (19.6%) increased when compared to July-December 2009.
- ✓ 2,579 individuals died with one or more prescription drugs in their system. The drugs were at both lethal and non-lethal levels. These drugs may have also been mixed with illicit drugs and alcohol.
- ✓ 1,268 individuals died with at least one prescription drug in their system that was, in the opinion of the medical examiner, the cause of death. These drugs may have been mixed with other prescription drugs, illicit drugs, and/or alcohol.

## **Medical Examiners Commission Members**

**Bruce A. Hyma, M.D.**  
District 11 Medical Examiner

**Russell S. Vega, M.D.**  
District 12 Medical Examiner

**Honorable Robert P. Peryam**  
Sheriff, Monroe County

**Mr. Kenneth T. Jones**  
Department of Health, Office of Vital Statistics

**Donna G. Hayes**  
Manatee County Commissioner

**Honorable James S. Purdy, J.D.**  
Public Defender, 7<sup>th</sup> Judicial Circuit

**Mr. Jon C. Thomas**  
Funeral Director, Forest Meadows Funeral Home & Cemeteries

**Robert J. Krauss, J.D.**  
Office of the Attorney General

**Honorable Jerry Hill**  
State Attorney, 10<sup>th</sup> Judicial Circuit

## Summary of Drug-Related Deaths January – June 2010

Drug Found in Body		Total Occurrences	Cause	Present
Ethanol		1,831	270	1,561
Amphetamines	<b>All Methylated Amphetamine cases*</b>	101	34	67
	Amphetamine	66	12	54
	Methamphetamine	49	20	29
	MDMA	22	8	14
	MDA	13	2	11
	MDEA	0	0	0
	Phentermine	3	0	3
	Benzodiazepines	<b>All Benzodiazepine cases*</b>	1,700	597
Alprazolam		986	439	547
Alpha-hydroxyalprazolam		96	10	86
Clonazepam		63	21	42
7-Aminoclonazepam		121	13	108
Chlordiazepoxide		35	3	32
Desalkylflurazepam		3	0	3
Diazepam		430	136	294
Estazolam		0	0	0
Flunitrazepam		0	0	0
Flurazepam		4	2	2
Lorazepam		101	11	90
Midazolam		66	2	64
Nordiazepam		347	73	274
Oxazepam		216	35	181
Temazepam		314	65	249
Triazolam		3	1	2
Alpha-hydroxytriazolam		2	0	2

\*Note: Many of the deaths were found to have several drugs contributing to the death, thus the count of specific drugs listed is greater than the number of cases.

## Summary of Drug-Related Deaths (continued)

	Drug Found in Body	Total Occurrences	Cause	Present
<b>Inhalants</b>	Chlorodifluoromethane	1	1	0
	Difluoroethane	11	9	2
	Freon	0	0	0
	Helium	3	3	0
	Nitrous Oxide	1	1	0
	Toluene	2	2	0
<b>Opioids</b>	Buprenorphine	4	2	2
	Codeine	69	17	52
	Fentanyl	97	51	46
	Heroin	30	25	5
	Hydrocodone	431	139	292
	Hydromorphone	87	25	62
	Meperidine	13	1	12
	Methadone	445	336	109
	Morphine	292	110	182
	Oxycodone	1,117	715	402
	Oxymorphone	223	52	171
	Propoxyphene	117	33	84
	Tramadol	109	23	86
<b>Other</b>	Cannabinoids	389	0	389
	Carisoprodol/Meprobamate	220	48	172
	Cocaine	603	250	353
	GHB	3	2	1
	Ketamine	2	0	2
	Phencyclidine (PCP)	0	0	0
	Zolpidem	102	17	85

*\*Note: Many of the deaths were found to have several drugs contributing to the death, thus the count of specific drugs listed is greater than the number of cases.*

## Frequency of Occurrence of Drugs in Decedents January – June 2010

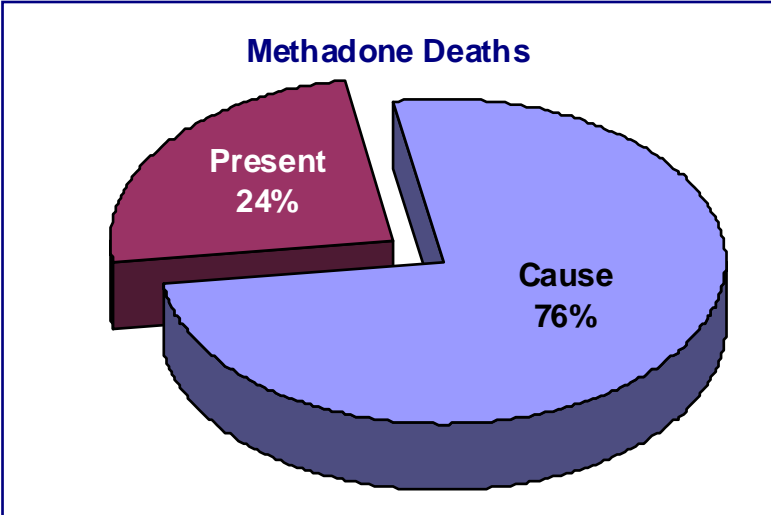

Heroin, Codeine, GHB, PCP, Ketamine, Freon, Meperidine, all tracked inhalants, and Buprenorphine constituted less than 1% of the drug frequencies.

Note: Many of the deaths were found to have several drugs contributing to the death, thus the count of specific drugs is greater than the number of cases.

## Manners of Death for Cases Reported (Accidental, Homicide, Natural, Suicide or Undetermined)

## Glossary

**Benzodiazepine** – A family of sedative-hypnotic drugs indicated for the treatment of stress, anxiety, seizures and alcohol withdrawal. Benzodiazepines are often referred to as “minor tranquilizers.” Xanax (Alprazolam) and Valium (Diazepam) are the most commonly prescribed drugs in this drug class.

**Buprenorphine** – A semi-synthetic opioid known as Buprenex, Suboxone, and Subutex indicated for the treatment of opioid addiction and moderate to severe pain.

**Cannabinoids** – A series of compounds found in the marijuana plant, the most psychoactive of which is THC, a strong, illicit hallucinogen. Street names for this drug are often associated with a geographic area from which it came but also include generic names like “ganja”, “MJ”, “ragweed”, “reefer” and “grass.”

**Carisoprodol** – Muscle relaxant indicated for the treatment of pain, muscle spasms and limited mobility. It is often abused in conjunction with analgesics for enhanced euphoric effect. It is marketed as Soma.

**Cocaine** – An illicit stimulant. Powdered cocaine goes by many street names including “C”, “blow”, “snow” and “nose candy”, while freebase cocaine is mostly commonly known as “crack.”

**Difluoroethane** – A gas that is commonly found in electronic cleaning products, and many other consumer aerosol products.

**Ethyl Alcohol** – Alcohol or ethanol.

**Fentanyl** – Synthetic narcotic analgesic (pain killer) used in the Duragesic transdermal patch. Also available in a solid “lollypop” sold under the brand name Actiq.

**Gamma-Hydroxybutyric Acid (GHB)** – A depressant, also known as a “date rape” drug. GHB often goes by the street name “easy lay”, “scoop”, “liquid X”, “Georgia home boy” and “grievous bodily harm.”

**Heroin** – An illicit narcotic derivative. It is a semi-synthetic product of opium. Heroin also has multiple street names including “H”, “hombre” and “smack.”

**Hydrocodone** – A narcotic analgesic (pain killer). Vicodin and Lortab are two common drugs containing hydrocodone.

**Hydromorphone** – A narcotic analgesic (pain killer) used to treat moderate to severe pain. Marketed under the trade name Dilaudid, it is two to eight times more potent than morphine. Commonly used by abusers as a substitute for heroin.

**Ketamine** – An animal tranquilizer and a chemical relative of PCP. Street names for this drug include “special K”, “vitamin K” and “cat valium.”

## Glossary (continued)

**Meperidine** – A synthetic narcotic analgesic (pain killer) sold under the trade name Demerol, it is used for pre-anesthesia and the relief of moderate to severe pain.

**Methadone** – A synthetic narcotic analgesic (pain killer) commonly associated with Heroin detoxification and maintenance programs but it is also prescribed to treat severe pain. It has been increasingly prescribed in place of oxycodone for pain management. Dolophine is one form of methadone.

**Methylated Amphetamines** – Includes such drugs as methamphetamine (stimulant) and MDMA (Ecstasy – which is a hallucinogen). Ecstasy has multiple street names including “E”, “XTC”, “love drug”, and “clarity”. MDMA is often also known by a large variety of embossed logos on the pills such as “Mitsubishis” and “Killer Bees”. Methamphetamine is also known as “meth”, “crank”, “speed” and “tina”.

**Morphine** – A narcotic analgesic (pain killer) used to treat moderate to severe pain. MS (Morphine Sulfate), Kadian, and MS-Contin are the tablet forms, Roxanol is the liquid form.

**Nitrous Oxide (N<sub>2</sub>O)** – Also known as "laughing gas," this is an inhalant (gas) that produces light anesthesia and analgesia. “Whippets” are a common form of nitrous oxide.

**Oxycodone** – A narcotic analgesic (pain killer). OxyContin is one form of this drug and goes by the street name “OC”. Percocet, Percodan, Roxicet, Tylox, and Roxicodone also contain Oxycodone.

**Oxymorphone** – A narcotic analgesic (pain killer). Prescribed as Opana, Numorphan, and Numorphone.

**Phencyclidine (PCP)** – An illicit dissociative anesthetic/hallucinogen. Common street names for this drug include “angel dust”, “ace”, “DOA” and “wack”.

**Propoxyphene** – A synthetic narcotic analgesic (pain killer) used for mild to moderate pain. A chemical cousin to methadone, it is marketed under the trade name Darvon and Darvocet when mixed with acetaminophen.

**Rohypnol** – Commonly referred to as a “date rape” drug. It is a sedative-hypnotic drug in the Benzodiazepine class. It often goes by the street name “roofies”.

**Tramadol** – A synthetic narcotic analgesic sold under the trade name Ultram and Ultracet. Indications include the treatment of moderate to severe pain. It is a chemical analogue to Codeine. Not currently a scheduled drug.

**Zolpidem** – A prescription medication used for the short-term treatment of insomnia. Commonly known as Ambien.
