

LANDSCAPE BEAUTIFICATION AWARDS APPLICATION FORM

PREVIOUS DISTINGUISHED
WINNERS!

Residential Beautification

Commercial Beautification

Residential Structural Beautification

Palm Coast Recognition Award Program

Beautification Award

The Beautification Award looks at the attributes that focus on visual beauty and design of the landscape while, at the same time, using native and/or drought tolerant plants. Use of appropriate plants and trees that soften and accent the structure is also important in consideration of this award. To be eligible for this award, the landscape must meet current code as to landscaping regulations.

Palm Coast Structural Beautification Award

This award would focus on exterior structural beautification efforts. This award would recognize those projects that show civic pride by beautifying their buildings while maintaining all appropriate codes and permits. Some examples of the type of improvements that could be considered are attractive additions, decks, paint schemes, awnings, shutters, planter boxes, boat houses, retaining walls and wall treatments or designs.

Palm Coast "Go Green" Award

This award would focus on projects that reflect a positive environmental impact on our natural resources. While the beautification awards consider the environmental impact as part of their consideration, this award would use it as the primary determinate. This award would help focus people on what they can do to help our environment and preserve the natural resources in their city. It will show those that are implementing "Green" methods that we recognize and appreciate their efforts. Some examples of this category would be multiple solar powered items (water heaters, pools, heating and A/C, lights, controllers, etc.), rain barrels, cisterns, drip irrigation, low impact development practices (pervious pavers, rain gardens), trees for shading the house, compost bins, recycling in any form and use of organic/microbiological fertilizers and pesticides in the landscape.

Palm Coast "We Noticed Your Efforts" signs

Used primarily for recognition of efforts to beautify our city for those that didn't win an award or smaller beautification projects. These signs would be posted on site and retrieved by City staff on a 30 days basis. The signs would be used to recognize those people who have made a special effort to beautify our city. This program would be used at any time throughout the year.

Program Guidelines

In order for a project to be eligible for any of the above awards, there must not be any code violations on the site unless it is considered an existing non-conforming situation and in this case, it would only be considered for the "We Noticed Your Efforts" sign.

**Palm Coast Landscape Beautification Award
Nomination Form**

Category: Home Business/
Multi-Family Non-Profit/
Public

Type of Award: Go Green
Award Beautification
Award Structural
Beautification

CHICK-FIL-A PALM COAST
1000 PALM COAST PARKWAY NW
PALM COAST, FL 32137

Chick-fil-A Palm Coast was built on an already developed parcel that was previously a Perkins Restaurant. Our objective was to marriage environment responsibility while beautifying the area. Chick-fil-A worked diligently with the City of Palm Coast to create a property that met the needs of the business while refreshing a prominent and highly visible corner of our beautiful city. In order to maintain the look of an established landscape we keep the graceful oak trees lining the property and developed the existing landscape around them. In order to minimize the impact on the lake abutting the property a wall was installed with full landscaping on both sides to provide protection from noise and litter. In addition, a break wall was installed to prevent erosion from parking lot run off. In total, over 40 existing plants were kept while 45 trees, including river birch and several varieties of elm, and over 1000 shrubs and ground covers were added.
