Workforce Education Tuition and Fees 2015-2016

The 2015 General Appropriations Act includes the following tuition and fees policies for 2015-2016.

Effective July 1, 2015, the following standard rates of tuition are in effect.

- **For Career Certificates/Applied Technology Diplomas, \$2.33 per contact hour.**
- **For Adult General Education, a block tuition rate of \$45 per half year, or \$30 per term.**

According to the workforce development fees statute, s. 1009.22(3), Florida Statutes (F.S.), a district's tuition must be within five percent (above or below) of the standard tuition and out-of-state fee, if applicable. For career certification and applied technology diploma programs, students who are classified as non-residents for tuition purposes under s. 1009.21, F.S., have a required out-of-state fee in addition to the tuition.

The tables found on the next pages provide a summary of the charges allowed for the program areas of Postsecondary Adult Vocational (PSAV) Career Certificates, Applied Technology Diplomas (ATD), and Adult General Education (AGE). The summary includes ranges for tuition; out-of-state fees; and the optional fees for student financial aid, capital improvement, and technology. See the table on page 2 for the minimum and maximum tuition ranges for career certificate programs and page 3 for the minimum and maximum block tuition for adult general education.

For Career Certificate/Applied Technology Diplomas, student financial aid, capital improvement, and technology fees are discretionary and are, therefore, not required.

However, it is important to note that if these fees are charged, the amount allowed to be charged varies. If student financial aid fees are charged, the highest amount allowed is ten percent of tuition (for residents) or ten percent of the sum of tuition and out-of-state fee (for nonresidents). Thus, the improvement or technology fees are charged, the highest amount allowed is five percent of tuition (for residents) or five percent of the sum of tuition of out-of-state fee (for nonresidents). Thus, the amount allowed to be charged for a capital improvement or technology fee is any percent **up to five percent**.
