| 6/17/2021 14:13:41 | Daniel | Finn | Substitute Pay Increase | Noticed article 06/17 Thursday Palm Coast Observer Topic: Substitute Pay Increase After 15 Years Question: when will the vote take place? Personally, a masters would go from \$90 to \$129. If this happens, I will sign up. Appreciated, Daniel Finn |
| 7/19/2021 11:49:23 | Angela | Raimondo | CDC Guidelines | Here we are again just weeks away from the start of a new school year, with skyrocketing Covid cases affecting our children now more than ever, and we have silence on the very clear-cut CDC guidelines and how this is going to affect our school year. These children sacrificed quite a bit for a year a half for the adults, and now that they are largely unvaccinated and unprotected versus the adults, the adults are refusing to protect them in this situation. This is shameful. It doesn't help that there are people in positions of power that abandon their education and promote pseudoscience and dangerous misinformation, one being on this very board, but that is for election day. My child will be attending school with a mask, as well as her required uniform. As is at any job or school, you don't get to argue about what they require and their uniform, although I am strongly against uniforms but try to change it the right way. We need to require masks by every adult that refuses or cannot get a vaccine that is around children, as well as masks for kids under 12, until they have access to the vaccine. I understand it is hard for the little ones, but this is where the adults that have responsibilities come in and need to mask up if they won't get vaccinated. They absolutely must meet us halfway. Just as none of us would argue with the worldwide consensus of mechanics when it comes to our cars, or the worldwide consensus of plumbers when it comes to our toilets, I fail to see why anyone that is not a scientist thinks that they can insert themselves into a field they are not an expert in or in the field at all. There are doctors and scientists out there of specific fields that would not insert themselves in other areas. And certainly no one can go get a job by doing research on the Internet. That's not even actual research, that's reading. I have been in my field for near 20 years, and I still have people I look up to and learn from. It's time we abandon our egos and show our children what it means to be critical thinkers and empathic humans. |

| 7/20/2021 11:33:18 | Danil | Finn | 7/20 vote on substitute pay raise | <p>Please add this information to the item in question. Most companies do not require applicants to pay for background checks, application fees, etc. This action is a hindrance to acquiring a sufficient amount of subs. It may not seem like a lot of money but for some, including retirees, it can make or break one's response to initiating an application.</p> |
| 7/22/2021 14:02:36 | Nancy | Allen | Masking our precious children | <p>I am the Grandparent of four students that attend Flagler County Public Schools (one in Old Kings Elementary, two in Matanzas High School, and one in Indian Trails Middle School). Although parts of two consecutive school years have been marred by COVID restrictions, it is critical for the mental well-being of our children that a third year does not contain pointless regulation pertaining to a virus that does not affect children in any significant manner.</p> <p>Earlier this month, the CDC recommended that school districts across the country mandate unvaccinated children to continue to wear masks and socially distance themselves from other children. Evidence proves that children are exponentially more likely to be killed from taking the vaccines or suffer from debilitating conditions like myocarditis than they are to suffer negative health effects from COVID. I have not seen a single study that would convince me that COVID is more of a threat to my grandchildren than these vaccines, which by admission of the government have killed more people than any vaccines combined over the past two decades.</p> <p>I do not consent to the school board relegating my grandchildren to second class status, allowing for families exercising the right to make their own health decisions to be "othered." Not only does this violate personal HIPPA protections, children deserve normalcy, and adults all over this country, and even in our own small city, have failed to provide that for them. I will not stand idly by and watch our school board reinstitute segregation. In Florida, masks have been shown to preserve bacteria much more effectively than they are able to prevent the intrusion of a virus.</p> <p>You must be the leaders your positions demand you to be. Analyze actual information from reliable sources and reject the pressure to conform to ideologically driven expectations from other school boards and do right by our children. Please feel free to contact me at (386) 302-0347 or nlallen4886@bellsouth.net if</p> |

| | | | | you have questions or would like more information pertaining to the contents of this letter. |
| 7/30/2021 14:21:03 | Jennifer | Mendoza | Masks/C OVID safety measures etc.. | At this point I don't think mandating masks is enough to ensure the safety of our kids. Parents are still being reckless and socializing in large crowds unmasked and unvaccinated. They want their freedom to choose so give it to them but give us that want to protect our kids the same right. I don't want my kids around maskless kids at any time during school. There's plenty on each side to give us both what we want. Separate the schools/classes into masked and unmasked. My masked child will still be vulnerable if around maskless kids. Don't give my kids a death sentence to appease others comforts. |
| 7/30/2021 15:27:41 | Joy | Mahon | Back to school safety- masks | If the district won't follow CDC And AAP guidelines to protect our children in making masks mandated for the safety of our children in all schools. Then can you designate a school or specific rooms to be mask free or mask required? Our kids deserve to be safe. We should have the right to send our kids to school safely during this pandemic and numbers are higher than last year. Why were more precautions taken then when the numbers weren't as high? Parents who don't want to follow CDC and AAP want their "rights and liberties". So do I! I ant my children to be able to go to school safely with TEMPORARY measures in place to make them as safe as possible. |
| 7/30/2021 19:55:52 | Jennifer | Cavaliere | Back to school safety | With the #s being higher now than when we were all remote or when we had many options for schooling last year, I am extremely concerned that there is no mask mandate this school year. As a teacher and as a parent, I would like for our campuses to have a mask mandate. I would like to feel safe in my classroom and I would like for my children to be safe. I don't feel like the district is looking out for our safety and that makes me, who has been an employee for 16 years feel very disappointed and concerned. |
| 8/2/2021 8:58:33 | Lisa | Dawson- Andrzejczyk | Masks in school | Given the high transmission in the area of the delta variant, the level of hospitalizations, the recommendations of the CDC, the American Academy of Pediatrics and the local health department, will you please protect our unvaccinated children and make masks mandatory? |

| | | | | |
|--------------------------|---------|-----------------|------------------|---|
| 8/2/20 21 9:20:22 | Christy | Vanzile | My sons safety | I kept my son home last year... Not from fear... Because SCIENCE said it would be best. Now if your kid can't mask... You keep yours home, you unvaxxed parents have zero rights to put my son at risk. Mask the children... Fuck the unvaxxed. It's your fault we are still in this pandemic. But please... Let's trust a crackhead who sells pillows... |
| 8/2/20 21 10:13:21 | Jessica | Matthews | Uniforms | <p>First, I would like to say we are excited for a great year ahead.</p> <p>I would like to make a suggestion related to the school uniforms. I personally don't mind the uniforms but I would like to see all schools be able to wear any color polo just as the high school is.</p> <p>I also would like to recommend that we revisit the dress code in relation to shorts. Almost all stores are selling shorts that have unfinished hems and holes. I think we need to be mindful of styles sold when we are enforcing dress codes. It is extremely hard for parents to find clothing that fits in this code.</p> <p>Thank you for consideration on this matter</p> |
| 8/2/20 21 15:03:08 | L | Hendricks on | Masking | <p>Please follow the recommendations of the Flagler County Health Department and the CDC in our schools. "Snyder added, "On July 28, the CDC updated its guidance that even vaccinated people in high risk communities like Flagler County should wear masks indoors. The Delta Variant is highly contagious, which helps to explain why we had 665 positive cases this week compared with 400 a week ago. Please get vaccinated, wear a mask, wash your hands and social distance whenever possible. If you need to get tested and don't have symptoms, reach out to any pharmacy in the area. This is our shot, Flagler. Stay safe." 1 Please follow the Science for our Children!</p> <p>http://flagler.floridahealth.gov/newsroom/2021/08/First-Week-of-August-testing-and-Vaccination.html</p> |
| 8/2/20 21 16:52:07 | Wendy | Bosques | Safe school year | Daytona State has a contract that students sign basically accepting responsibility and agreeing to testing, honesty and communication if diagnosed with CoVid or the variants. Since there seems to be nothing in place to protect students, teachers etc. Would something similar be possible for Flagler schools? It would hold parents accountable for knowingly sending sick kids to school or sending them back without clearance from a doctor. With the lack of honesty and transparency from the district regarding following guidelines and notifications of Covid, this could make things clearer for those who insist on sending sick |
