

Petition To Stop The Purchase Of A \$600,000 Fire Truck During The 2014-2015 Fiscal Year

- It is my understanding that the City of Flagler Beach has three certified fire trucks available to combat fires including a perfectly capable tower/aerial truck.
- I am aware that the city has agreements with both Flagler County and Palm Coast to provide additional equipment and manpower in the event of a fire in Flagler Beach.
- I also understand that there is a plan in place, putting money aside to purchase a new "pumper" fire engine in a little over two years.
- It is therefore my conclusion that it is premature and unnecessary for the City of Flagler Beach to purchase a \$600,000 aerial fire truck, or any fire truck, during the 2014-2015 fiscal year.

Petition To Stop The Purchase Of A \$600,000 Fire Truck During The 2014-2015 Fiscal Year

- It is my understanding that the City of Flagler Beach has three certified fire trucks available to combat fires including a perfectly capable tower/aerial truck.
- I am aware that the city has agreements with both Flagler County and Palm Coast to provide additional equipment and manpower in the event of a fire in Flagler Beach.
- I also understand that there is a plan in place, putting money aside to purchase a new "pumper" fire engine in a little over two years.
- It is therefore my conclusion that it is premature and unnecessary for the City of Flagler Beach to purchase a \$600,000 aerial fire truck, or any fire truck, during the 2014-15 fiscal year.

Petition To Stop The Purchase Of A \$600,000 Fire Truck During The 2014-2015 Fiscal Year

- It is my understanding that the City of Flagler Beach has three certified fire trucks available to combat fires including a perfectly capable tower/aerial truck.
- I am aware that the city has agreements with both Flagler County and Palm Coast to provide additional equipment and manpower in the event of a fire in Flagler Beach.
- I also understand that there is a plan in place, putting money aside to purchase a new "pumper" fire engine in a little over two years.
- It is therefore my conclusion that it is premature and unnecessary for the City of Flagler Beach to purchase a \$600,000 aerial fire truck, or any fire truck, during the 2014-15 fiscal year.

- I am aware that the city has agreements with both Flagler County and Palm Coast to provide additional equipment and manpower in the event of a fire in Flagler Beach.
- I also understand that there is a plan in place, putting money aside to purchase a new "pumper" fire engine in a little over two years.
- It is therefore my conclusion that it is premature and unnecessary for the City of Flagler Beach to purchase a \$600,000 aerial fire truck, or any fire truck, during the 2014-2015 fiscal year.
