Support and Technical Staff14

Florida Department of Education Gerard Robinson, Commissioner Salaries for employees are the major operational expenditure for school districts. This data report presents average salary information for full-time district employees for the 2010-11 school year in 47 positions common across the districts.

Average salaries are presented for selected district- and school-level administrative staff, instructional staff, and support and technical staff. This report does not incorporate the salaries for all district employees.

Salaries contained herein are averages for those persons actually employed full-time in each district and are necessarily affected by the number of years of experience of those persons. Thus, caution should be used when analyzing and comparing district-to-district or district-to-state average salaries.

Although most employees are hired for 12 months each year, others work fewer months. The salaries of the employees who work fewer than 12 months were not adjusted to equate to 12-month salaries.

Teacher salaries, presented in Table 4, represent the average salaries of those professionals paid on the instructional salary schedule negotiated by a Florida school district. This salary represents not only classroom teachers but also other certificated instructional staff such as school librarians. Additional information relating to teacher salaries is contained in a separate data report, "Teacher Salary, Experience, and Degree Level."

Cautionary Note

In Florida, each public school district, after collective bargaining activities, adopts a salary schedule for instructional personnel in that district. In some school districts, a salary schedule for the school year is negotiated and adopted after the collection of salary data for that school year by the Department of Education (DOE). In many of these districts, the final negotiated salary schedule provides retroactive pay to instructional personnel for the entire school year. When this happens, the salary information on the DOE Staff Database does not reflect the subsequent salary increase for that district.

Users of staff salary data are advised to be aware of this and other factors affecting the data when making judgments and drawing conclusions based on these data.

The data source for 2010-11 staff salary information is the Florida Department of Education's Staff Database, Survey 3 data (February 7-11, 2011) as of August 8, 2011.
