

COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	266,576
Total persons of high, medium, or unknown risk	262,923
High/medium/unknown risk still being monitored	21,006

Persons tested: Includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,276,220	21,059
Positive	696,171	8,397
Negative	4,572,930	12,618
Inconclusive	7,119	44

Cases: people with positive PCR or antigen test result

Total cases	704,568
Florida residents	696,171
Non-Florida residents	8,397
Type of testing	
Florida residents	696,171
Positive by BPHL/CDC	24,802
Positive by commercial/hospital lab	671,369
PCR positive	679,513
Antigen positive	16,658
Non-Florida residents	8,397
Positive by BPHL/CDC	256
Positive by commercial/hospital lab	8,141
PCR positive	7,948
Antigen positive	449

Characteristics	
Florida residents hospitalized	43,855
Florida resident deaths	14,143
Non-Florida resident deaths	170

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents

Traveled	5,741
Contact with a known case	253,351
Traveled and contact with a known case	6,029
Neither	431,050
No travel and no contact	87,904
Travel is unknown	244,568
Contact is unknown	179,481
Contact is pending	145,020

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

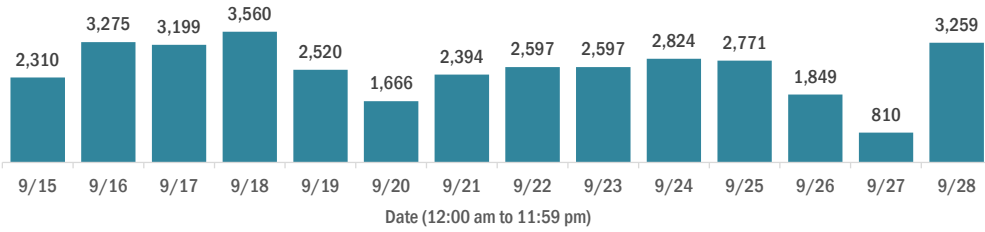

COVID-19: cases and laboratory testing over time

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

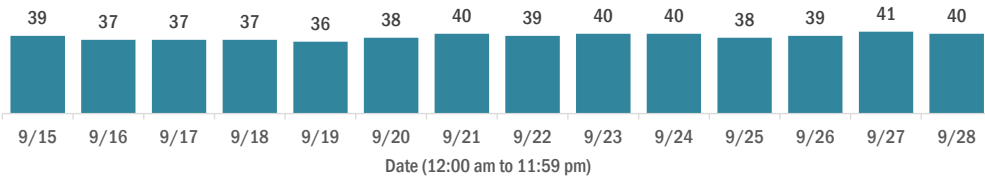

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

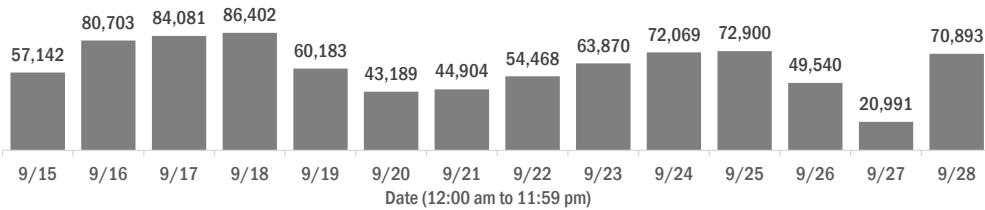

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

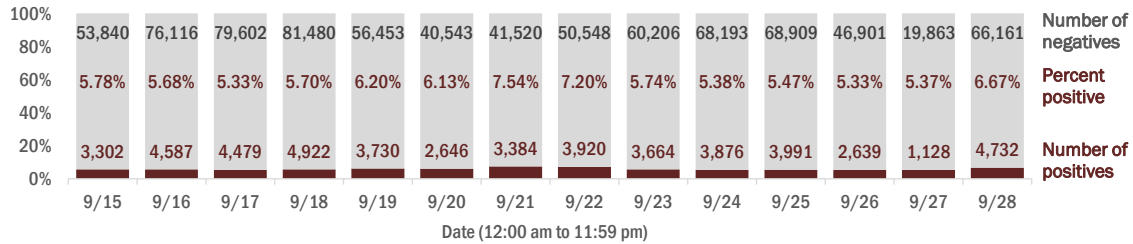

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 5.33% to 7.54% over the past 2 weeks and was 6.67% yesterday.

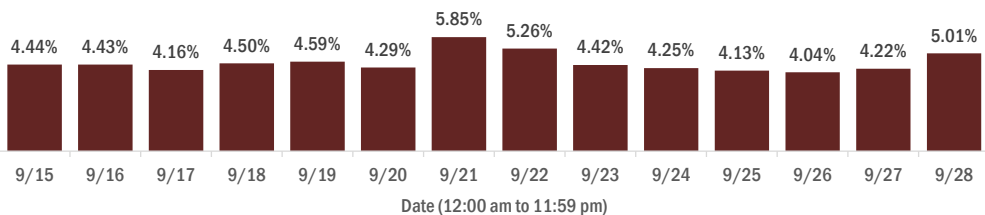

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.04% to 5.85% over the past 2 weeks and was 5.01% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 696,171 Florida resident cases

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: additional surveillance information

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

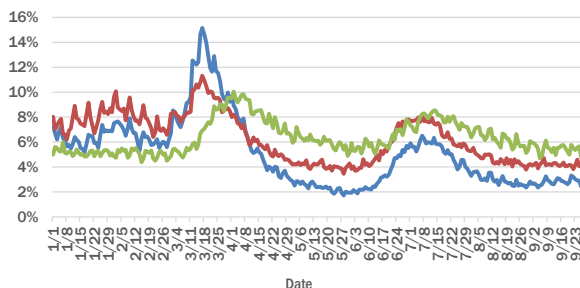

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

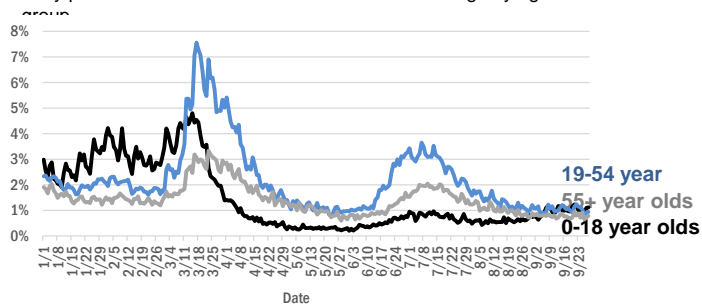

Daily percent of ED visits statewide that result in cough-associated admissions

Daily percent of ED visits that mention cough, fever, or shortness of breath

Daily percent of ED visits statewide that mention cough by age

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 211 of 212 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

COVID-19: All Florida residents with test results reported

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The table below includes persons with laboratory results that the Department of Health has received electronically or by mail/fax for Florida residents.

County	Awaiting testing	Inconclusive	Negative	Positive	Percent positive	Total tested

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 28, 2020 verified as of Sep 29, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
