

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

| | |
|--|----------------|
| Total reports | 283,826 |
| Total persons of high, medium, or unknown risk | 280,185 |
| High/medium/unknown risk still being monitored | 20,778 |

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

| | Florida residents | Non-Florida residents |
|--------------|-------------------|-----------------------|
| Total tested | 5,445,417 | 21,510 |
| Positive | 713,902 | 8,805 |
| Negative | 4,724,344 | 12,660 |
| Inconclusive | 7,171 | 45 |

Cases: people with positive PCR or antigen test result

| | |
|-----------------------|----------------|
| Total cases | 722,707 |
| Florida residents | 713,902 |
| Non-Florida residents | 8,805 |

| | |
|-------------------------------------|---------|
| Type of testing | |
| Florida residents | 713,902 |
| Positive by BPHL/CDC | 25,418 |
| Positive by commercial/hospital lab | 688,484 |
| PCR positive | 694,361 |
| Antigen positive | 19,541 |
| Non-Florida residents | 8,805 |
| Positive by BPHL/CDC | 261 |
| Positive by commercial/hospital lab | 8,544 |
| PCR positive | 8,273 |
| Antigen positive | 532 |

| | |
|--------------------------------|--------|
| Characteristics | |
| Florida residents hospitalized | 45,259 |
| Florida resident deaths | 14,904 |
| Non-Florida resident deaths | 180 |

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

| | |
|---|---------|
| Risk factors for Florida residents | |
| Traveled | 6,037 |
| Contact with a known case | 264,026 |
| Traveled and contact with a known case | 6,393 |
| Neither | 437,446 |
| No travel and no contact | 92,351 |
| Travel is unknown | 242,910 |
| Contact is unknown | 187,694 |
| Contact is pending | 138,104 |

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.92% to 6.83% over the past 2 weeks and was 5.33% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.74% to 5.25% over the past 2 weeks and was 4.15% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 713,902 Florida resident cases

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

| Age group | Cases | Hospitalizations | Deaths |

COVID-19: characteristics of 713,902 Florida resident cases

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The table below includes the cities and counties of residence for cases in Florida residents based on the patient's ZIP Code.

Note that city is not always received as part of the initial notification and may be missing while the case is being investigated.

| City and county | Cases |
|-----------------------------|--------|
| Miami, Dade | 98,269 |

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 6, 2020 verified as of Oct 7, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
