

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	293,868
Total persons of high, medium, or unknown risk	290,228
High/medium/unknown risk still being monitored	21,811

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,535,937	21,761
Positive	725,415	9,076
Negative	4,803,400	12,640
Inconclusive	7,122	45

Cases: people with positive PCR or antigen test result

Total cases	734,491
Florida residents	725,415
Non-Florida residents	9,076

Type of testing	
Florida residents	725,415
Positive by BPHL/CDC	25,944
Positive by commercial/hospital lab	699,471
PCR positive	704,398
Antigen positive	21,017
Non-Florida residents	9,076
Positive by BPHL/CDC	270
Positive by commercial/hospital lab	8,806
PCR positive	8,486
Antigen positive	590

Characteristics	
Florida residents hospitalized	45,924
Florida resident deaths	15,364
Non-Florida resident deaths	188

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	6,200
Contact with a known case	269,024
Traveled and contact with a known case	6,588
Neither	443,603
No travel and no contact	94,443
Travel is unknown	245,108
Contact is unknown	190,816
Contact is pending	138,790

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

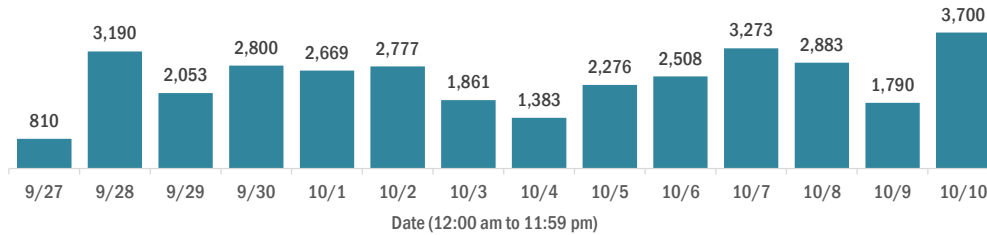

COVID-19: cases and laboratory testing over time

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

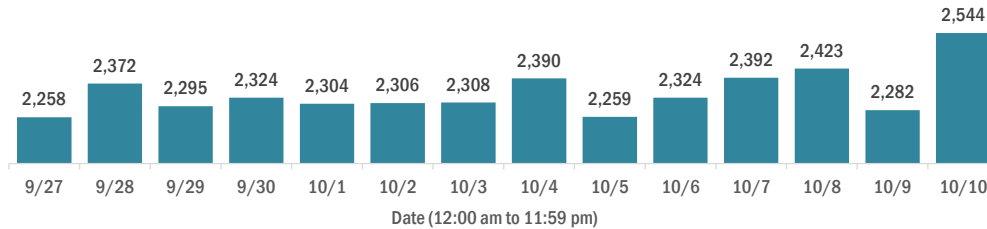

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

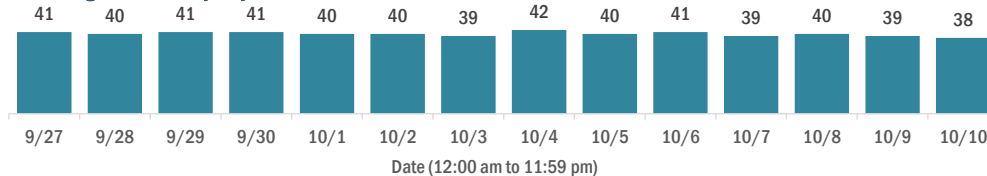

Number of cases per day

7-day average number of cases

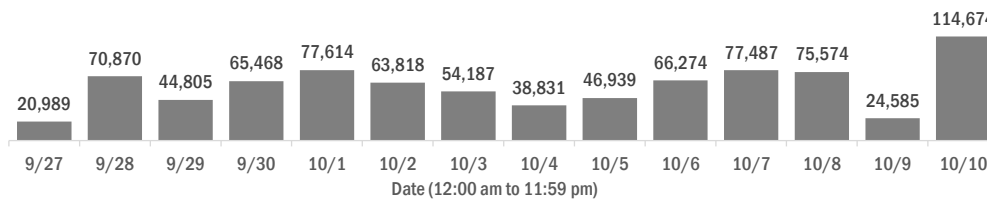

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

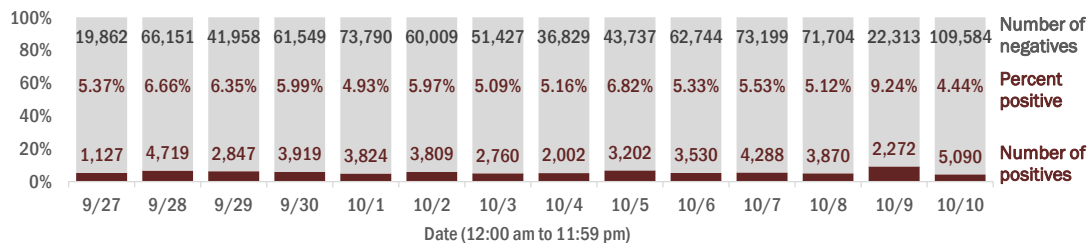

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.44% to 9.24% over the past 2 weeks and was 4.44% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

COVID-19: cases and laboratory testing over time

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

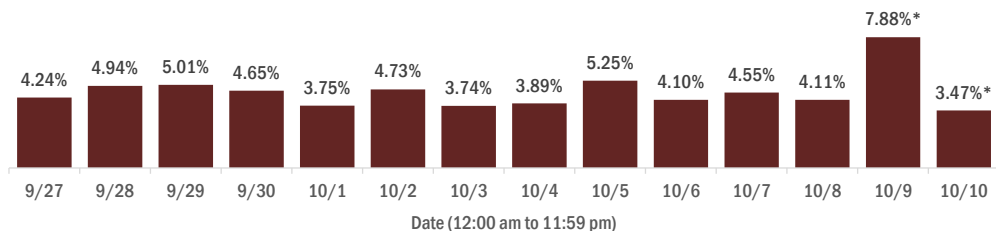

Data in this report are provisional and subject to change.

Laboratory testing for Florida residents over the past 2 weeks

Percent positivity for new cases in Florida residents

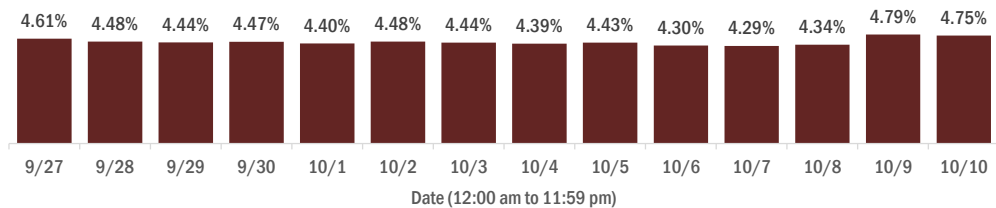

The percent of positive results ranged from 3.47% to 7.88% over the past 2 weeks and was 3.47% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.24%.

7-day average percent positivity for new cases in Florida residents

COVID-19: characteristics of 725,415 Florida resident cases

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

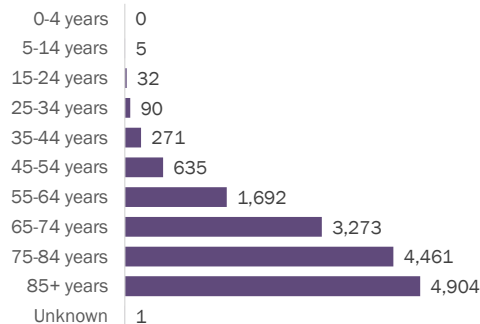

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 10, 2020 verified as of Oct 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
