

COVID-19: summary of persons monitored, persons tested, and cases

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

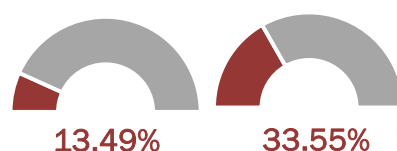

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	188,892
Total persons of high, medium, or unknown risk	185,231
High/medium/unknown risk still being monitored	12,806

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,389,768	18,843
Positive	591,283	6,314
Negative	3,791,743	12,507
Inconclusive	6,742	22
Awaiting testing	3,544	28

Percent positivity
(based on positive and negative results)

Cases: people with positive PCR or antigen test result

Total cases	597,597
Florida residents	591,283
Non-Florida residents	6,314

Type of testing	
Florida residents	591,283
Positive by BPHL/CDC	21,219
Positive by commercial/hospital lab	570,064
PCR positive	584,680
Antigen positive	6,603
Non-Florida residents	6,314
Positive by BPHL/CDC	220
Positive by commercial/hospital lab	6,094
PCR positive	6,062
Antigen positive	252

Characteristics	
Florida residents hospitalized	36,329
Florida resident deaths	10,274
Non-Florida resident deaths	137

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	4,485
Contact with a known case	190,987
Traveled and contact with a known case	4,694
Neither	391,117
No travel and no contact	68,571
Travel is unknown	244,051
Contact is unknown	135,638
Contact is pending	171,299

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

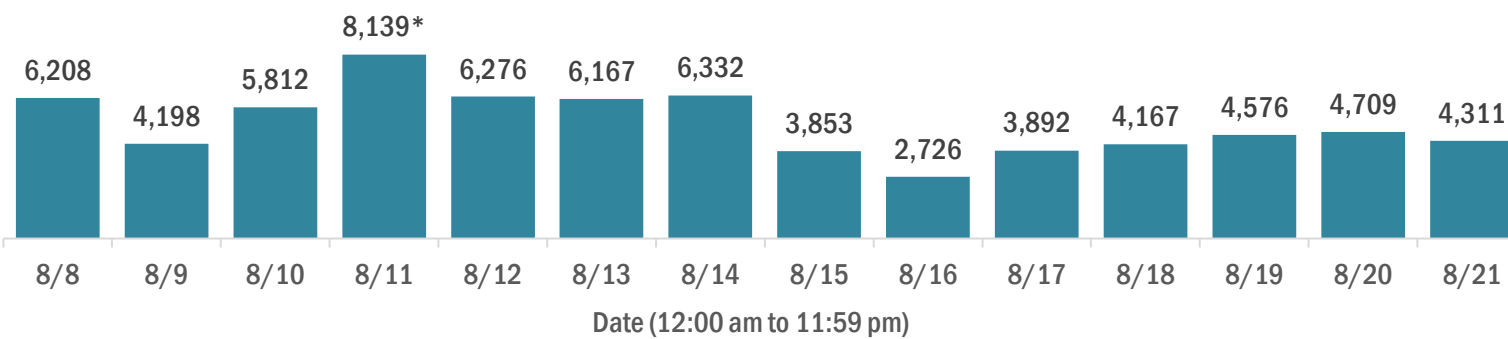

COVID-19: cases and laboratory testing over time

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

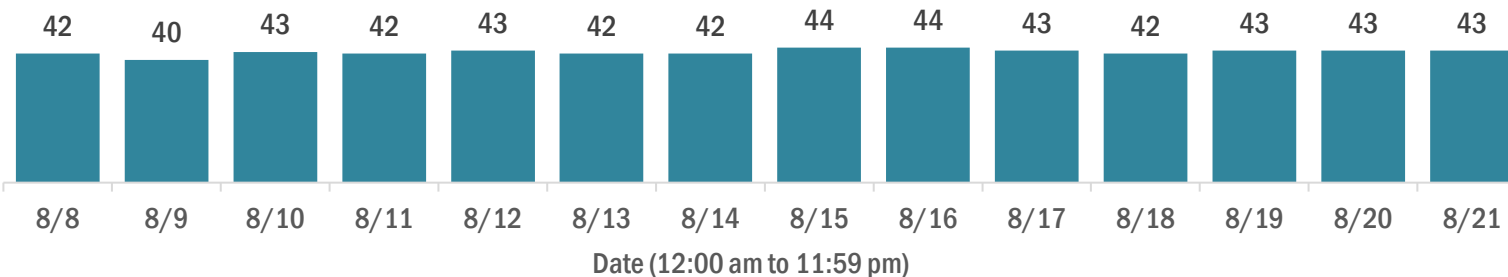

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The number of new cases on 8/11 excluding the historical data submission was 5,218.

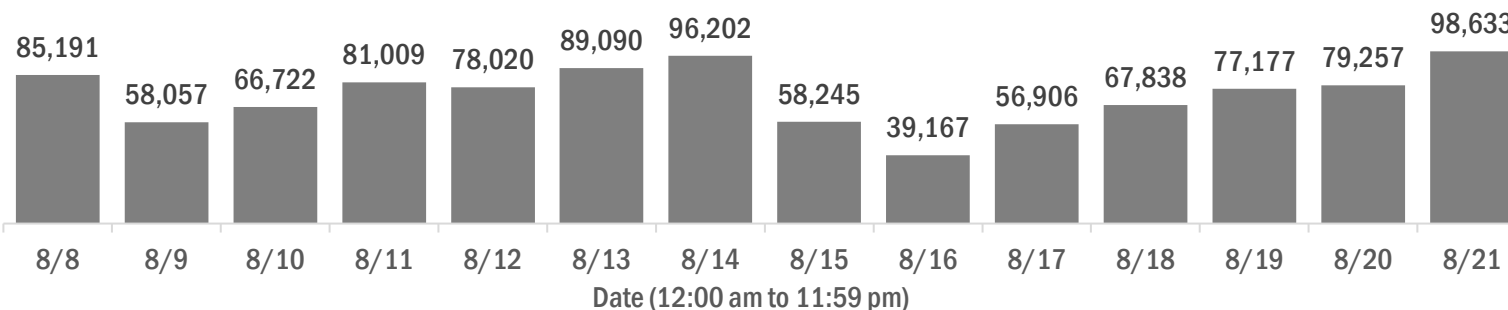

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

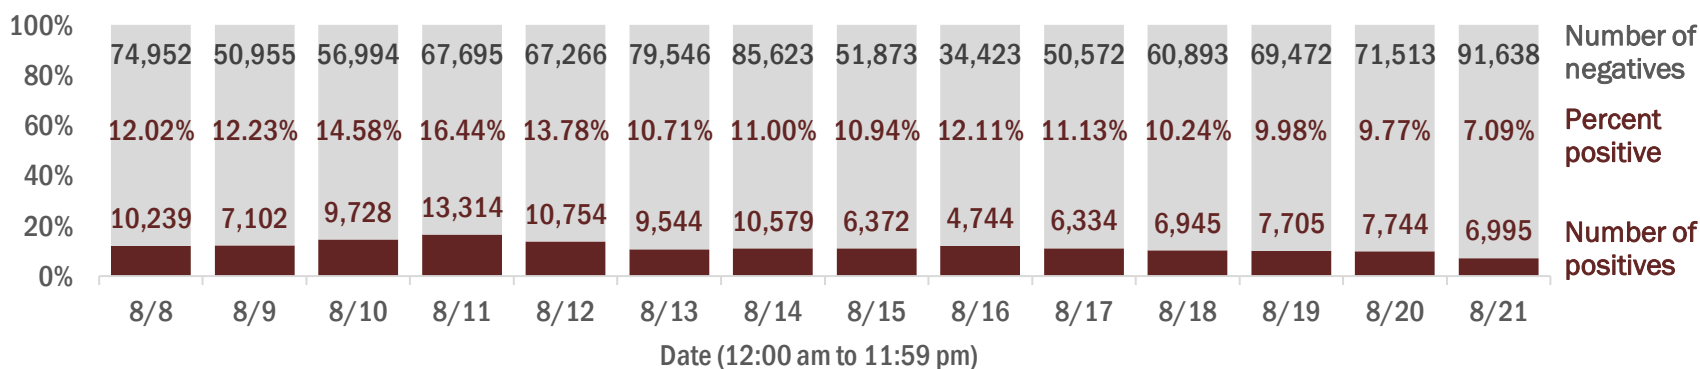

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 7.09% to 16.44% over the past 2 weeks and was 7.09% yesterday.

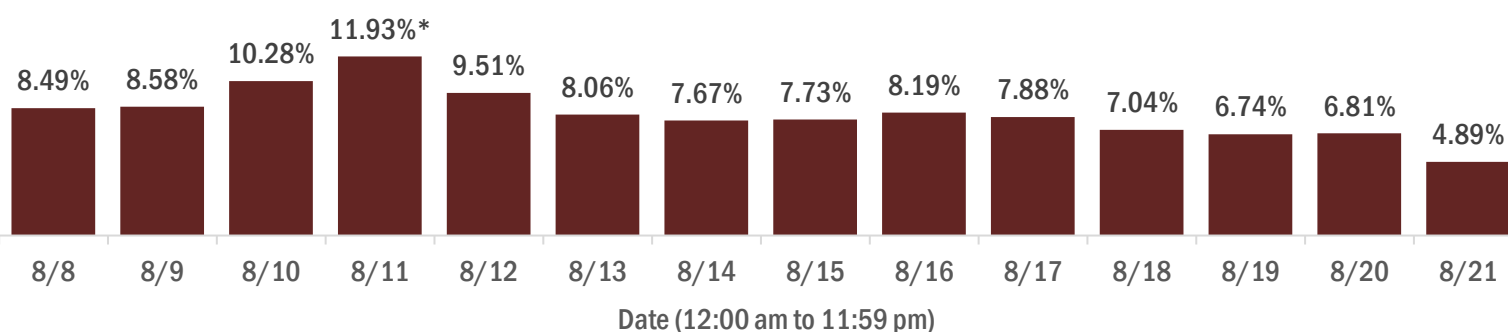

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.89% to 11.93% over the past 2 weeks and was 4.89% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The percent positivity on 8/11 excluding the historical data submission was 9.35%.

COVID-19: characteristics of 591,283 Florida resident cases

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

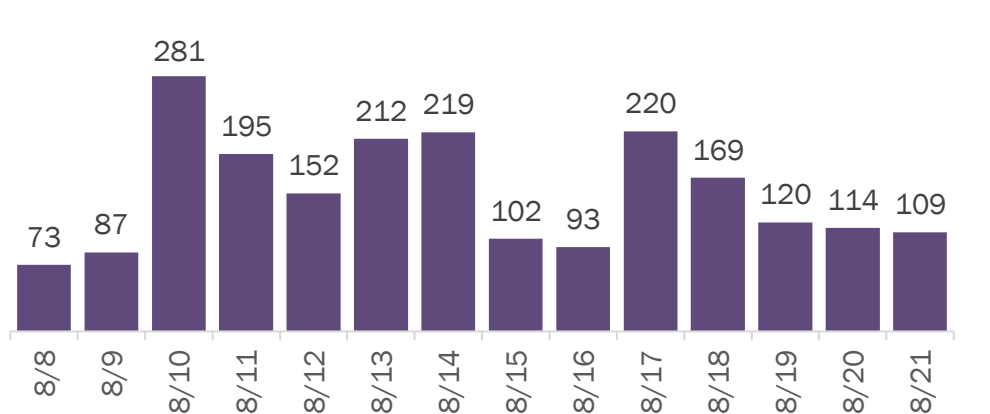

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 21, 2020 verified as of Aug 22, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
