

# COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

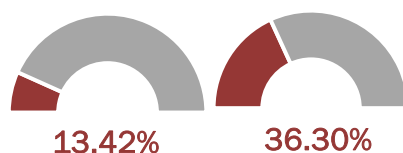

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

<b>Total reports</b>	<b>216,590</b>
Total persons of high, medium, or unknown risk	212,931
High/medium/unknown risk still being monitored	15,231

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,750,980	19,896
Positive	636,653	7,214
Negative	4,107,282	12,658
Inconclusive	7,045	24
Awaiting testing	3,548	29

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

<b>Total cases</b>	<b>643,867</b>
Florida residents	636,653
Non-Florida residents	7,214

<b>Type of testing</b>	
Florida residents	636,653
Positive by BPHL/CDC	22,817
Positive by commercial/hospital lab	613,836
PCR positive	626,376
Antigen positive	10,277
Non-Florida residents	7,214
Positive by BPHL/CDC	245
Positive by commercial/hospital lab	6,969
PCR positive	6,888
Antigen positive	326

<b>Characteristics</b>	
Florida residents hospitalized	39,912
Florida resident deaths	11,811
Non-Florida resident deaths	152

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at [www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm](http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm).

<b>Risk factors for Florida residents</b>	
Traveled	4,932
Contact with a known case	215,089
Traveled and contact with a known case	5,236
Neither	411,396
No travel and no contact	76,756
Travel is unknown	247,790
Contact is unknown	153,127
Contact is pending	164,661

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

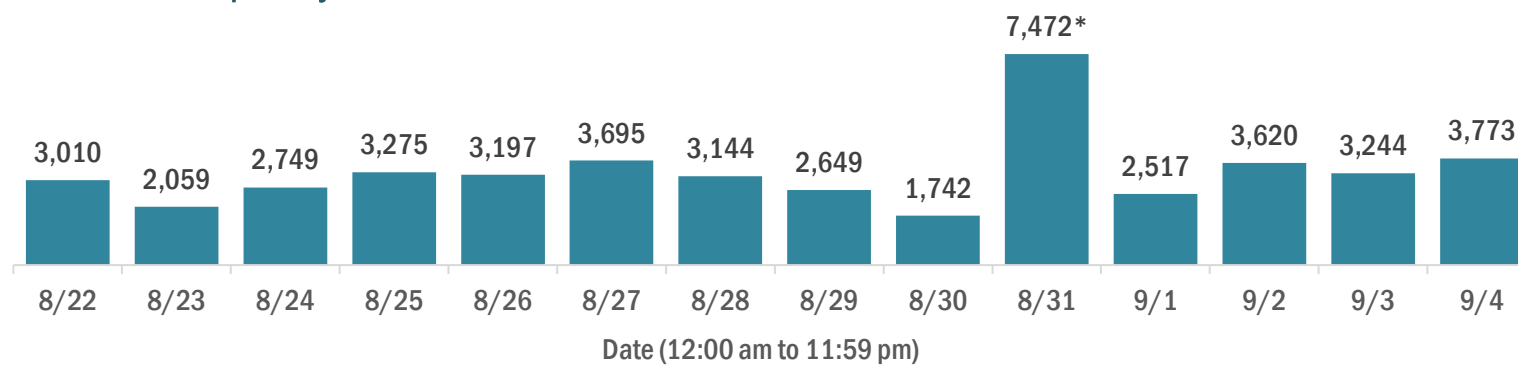

# COVID-19: cases and laboratory testing over time

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

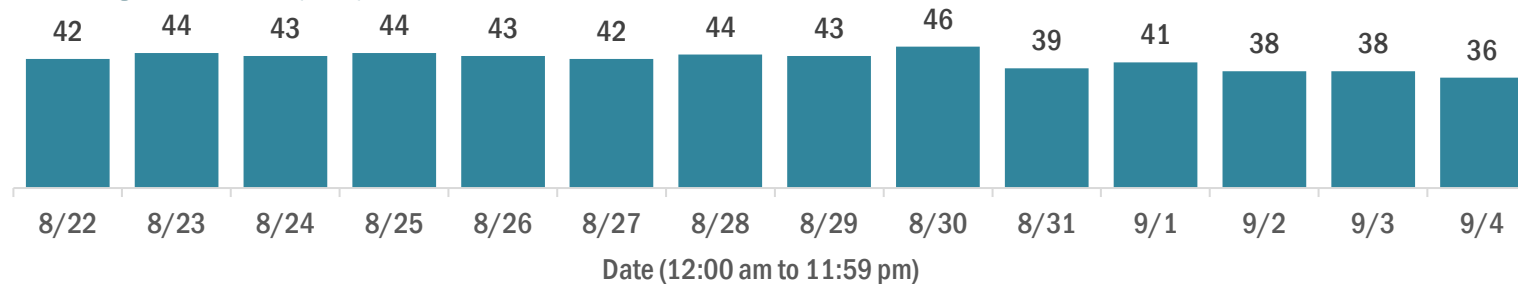

## Cases in Florida residents per day for the past 2 weeks

### Number of cases per day

\* Includes a one-time historical data submission of 3,808 cases from a large laboratory. The number of new cases on 8/31 excluding the historical data submission was 3,664. See graph on next page for excess cases by specimen collection date.

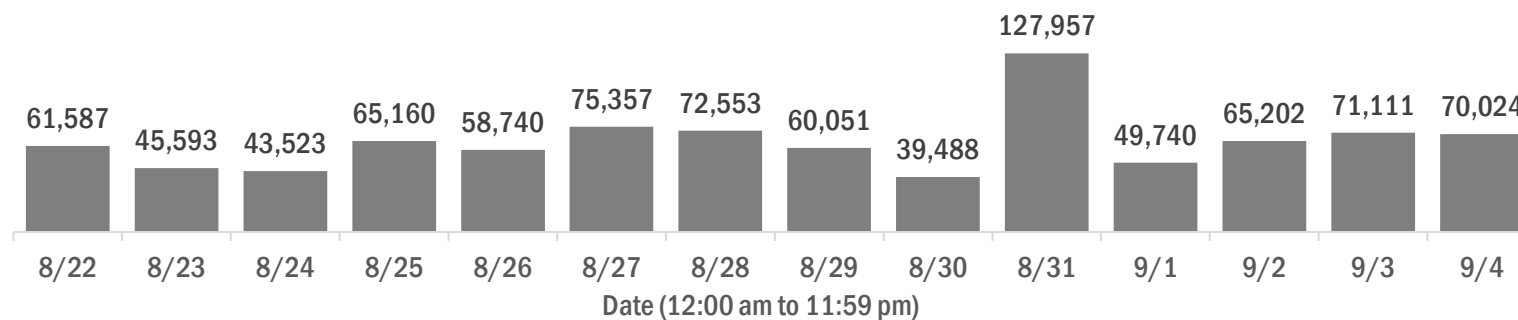

### Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

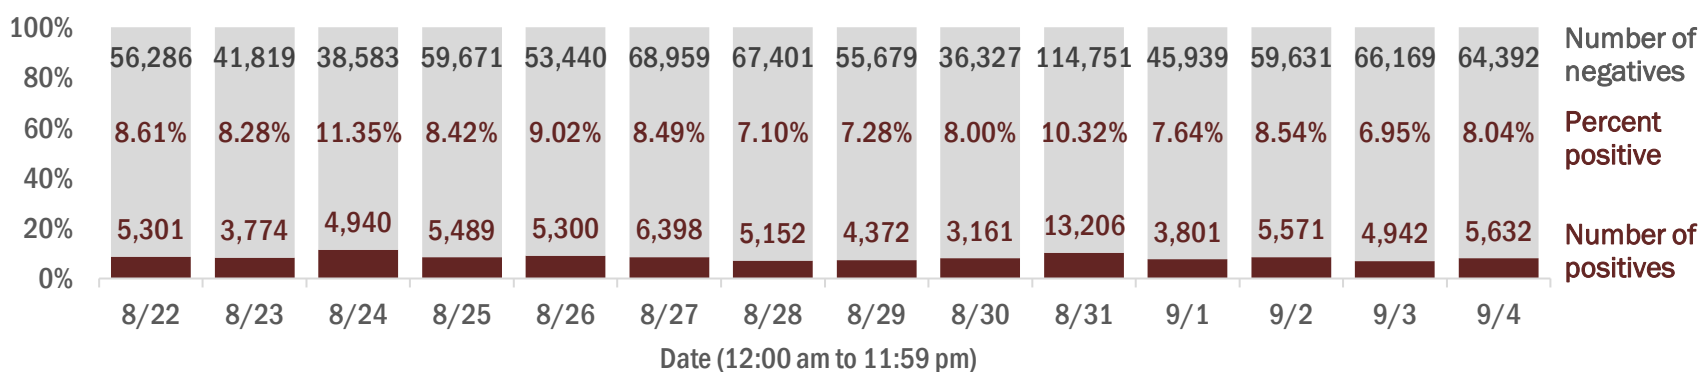

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 6.95% to 11.35% over the past 2 weeks and was 8.04% yesterday.

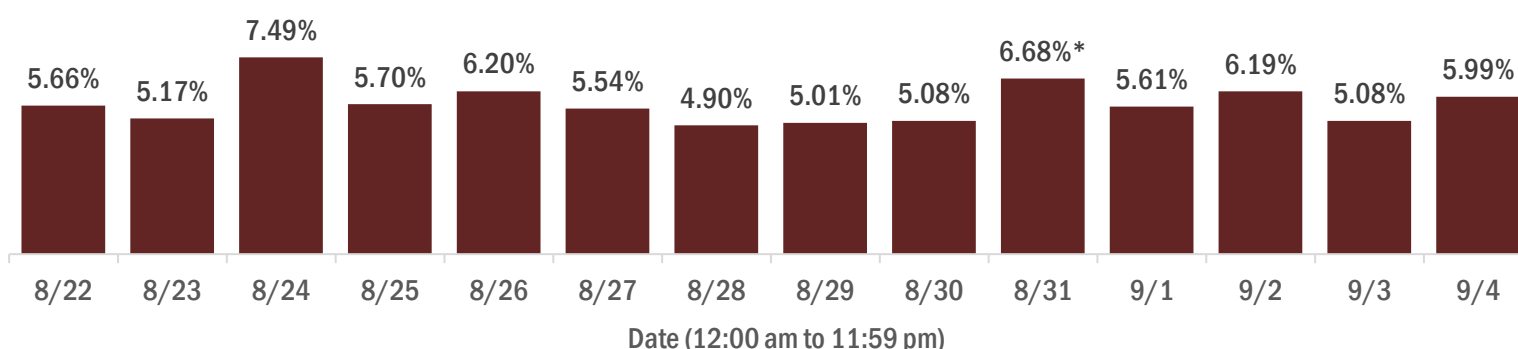

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.90% to 7.49% over the past 2 weeks and was 5.99% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

\* Includes a one-time historical data submission from a large laboratory. The percent positivity on 8/31 excluding the historical data submission was 5.59%. See graph on next page for excess cases by specimen collection date.

# COVID-19: cases and laboratory testing over time

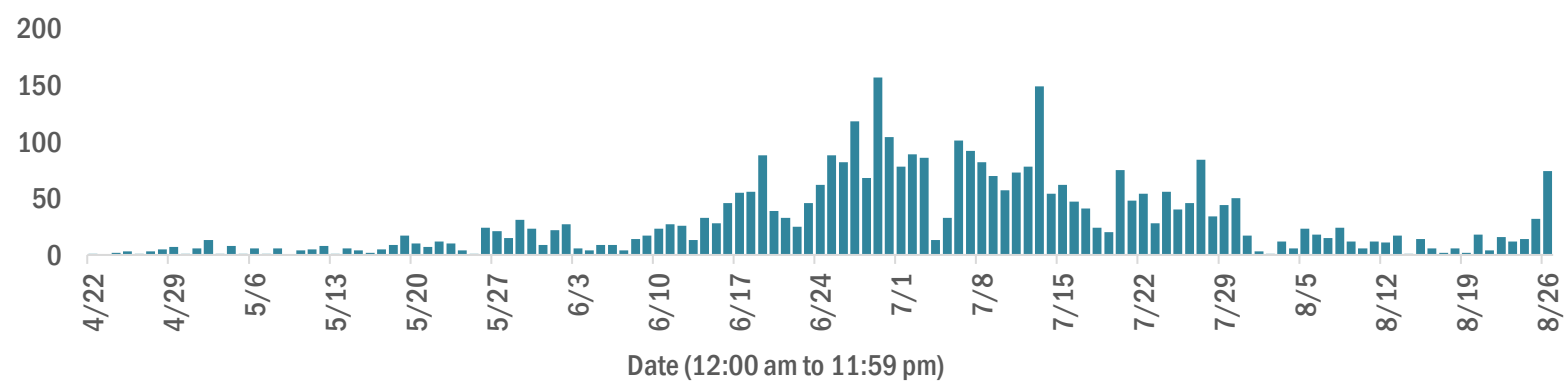

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Excess cases counted on 8/31 by specimen collection date

### Number of cases per day

On 8/31, the Department received a one-time historical data submission from a large laboratory resulting in 3,808 cases being created from specimens collected before 8/27. Below is the number of cases by the earliest specimen collection date.

# COVID-19: characteristics of 636,653 Florida resident cases

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

# COVID-19: testing by laboratory

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

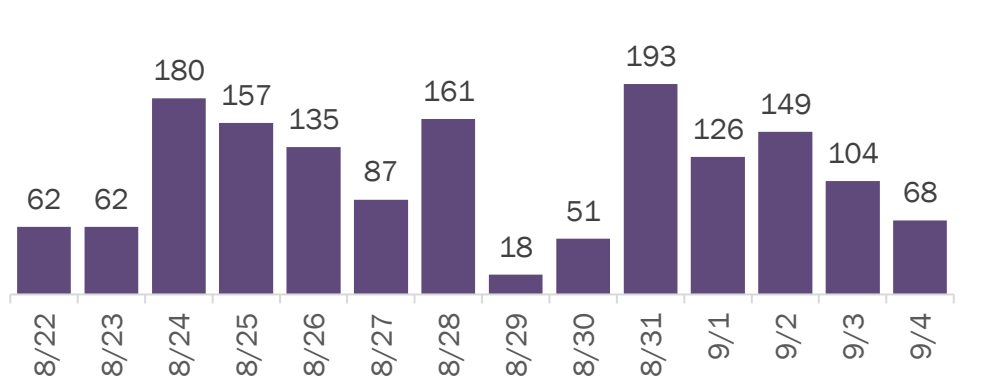

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Sep 4, 2020 verified as of Sep 5, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
