Subject: Palm Coast Cultural Arts project, Daytona State College student project thereto;
Dear Conference Center Committee:

Certain email communications have been forwarded to me which indicate a desire to alter financial projections and/or other information developed in the recent subject student project. All financial projections provided (in confidence) to the Committee are compiled from the information provided to our student team by you, and are consistent pro-forma of your banquet center project element. Any alteration, change or adaptation of any element of that report is expressly forbidden. Confidentiality is a two-way street.

I am the faculty advisor for said team and project, and all elements of the student project were cleared by me. Neither I, the student team, nor Daytona State College will authorize any alteration to course materials. We will not be associated with anyone else's projections.

Additionally, please ensure that any email transmissions of said student project be deleted, as any publicly discussed or private revisions to Daytona State student work will be considered a breach of confidentiality.

In the future, please refer any communication regarding this matter directly to me.

Thank you for the opportunity to provide our students with this experience.

Dr. Mike Avery
